

# PROCAD Profile

Software solutions for small and medium businesses

PROCAD is a German company specializing in product lifecycle management (PLM), product data management (PDM) and document management (DMS) solutions. For more than 25 years, we have been committed to improving the efficiency of PLM processes for and with our customers.

We know the challenges you face: We are engineers and designers ourselves and come from a manufacturing background. As a medium-sized business we understand the needs of other small and medium-sized businesses. PROCAD will be there for you in the long run to help you bring more efficiency to your PLM and deliver the products you need. >>

### Our solutions

Our portfolio includes **PRO.FILE**, a PDM and DMS solution, **PRO.CEED**, a PLM enhancement for the management and automation of seamless PLM processes, and **PROOM**, a solution for the controlled exchange of technical documents in projects.

**PRO.FILE** serves as a “product data backbone” that helps you manage and integrate product data across the enterprise and throughout the product life cycle. The secure and central storage of all product and development data creates transparent processes and workflows within the enterprise. **PRO.FILE** can be integrated with all major CAD and ERP systems and provides the basis for the implementation of PLM processes.

**PRO.CEED** implements faster PLM processes that are less error-prone and time-consuming to measurably improve their efficiency. **PRO.CEED** allows companies to fully integrate the flow of information along the product life cycle.

**PROOM** makes the exchange of technical documents and information in project partnerships easier and more secure. Our solution replaces traditional email or FTP solutions by taking a modern, cloud-based approach that allows users to exchange data in virtual project rooms. **PROOM** is available as a software-as-a-service (SaaS) solution and can be deployed as a private cloud.

### Integrated with your system environment and processes

In order for you to tap the full potential of a DMS, PDM or PLM solution, it needs to be tightly integrated with your system environment and your processes. This is why we consider system integration and partnerships a core element of our mission.

- Integration with leading CAD solutions such as AutoCAD and Inventor, Creo (formerly Pro/ Engineer), SolidWorks, Catia, Solid Edge, and NX
- Integration with leading ERP solutions such as ams.erp, APplus, epicor vantage, infor, Microsoft Dynamics, oxaion, PSIpenta, and SAP
- Microsoft Gold Partner
- AutoVue partner for visualization solutions
- KOFAX partner for automatic document capture solutions
- Partner of numerous universities and research institutions
- Member of the German Engineering Federation (VDMA), the Federal Association for Information Technology, Telecommunications and New Media (BITKOM), the eCl@ss association, and the Sandler Circle for PLM vendors

### Facts and figures:

- Founded 1985 in Karlsruhe, Germany
- More than 120 employees
- German offices in Karlsruhe, Essen, Munich, Hamburg, and Nuremberg
- International offices in the United States and Switzerland and partners in Austria, Italy, the Netherlands, and Switzerland
